

INDIAN GEOTECHNICAL SOCIETY
BARODA CHAPTER

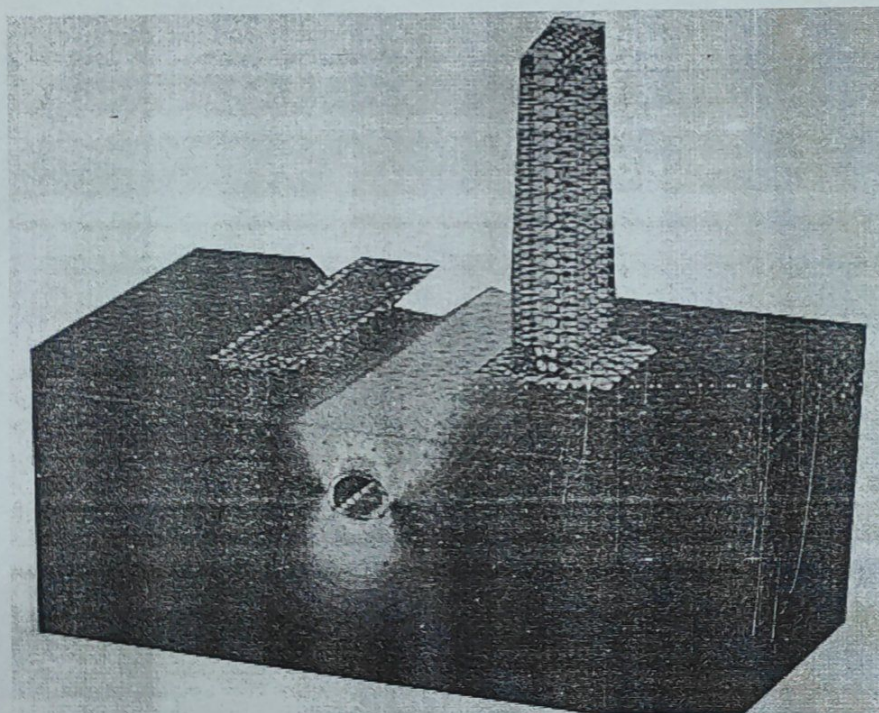

IN ASSOCIATION WITH

APPLIED MECHANICS DEPARTMENT,
M S UNIVERSITY OF BARODA, VADODARA

Proceedings Volume
Of
NATIONAL SEMINAR ON

SOFTWARE APPLICATIONS IN GEOTECHNICAL ENGINEERING,
SAGE-18

6TH, 7TH OCTOBER – 2018

Indian Geotechnical Society, Baroda Chapter
Race Course, GERI Campus, VADODARA-390007

NATIONALSEMINAR on
SOFTWARE APPLICATIONS IN GEOTECHNICAL ENGINEERING,
SAGE-18

INDEX

Sr.No.	Paper	Page no.
1	Reinforced soil structure design & applications: demonstration through a landslide case study at Uttarakhand Moumita Chakraborty	1
2	Soil Structure Interaction (SSI) Models Siddharth G. Shah	9
3	Ultimate Pullout Capacity of Granular Pile Anchors (GPA) in c- ϕ soils by Cavity Expansion Theory Vidyaranya Bandi	25
4	Numerical Modelling Of Geosynthetic Reinforced Stone Column Yogendra Tandel	29
5	Application of ALP software for analysis of laterally loaded by specified P-Y curve Devang Gajera	31
6	Probabilistic seismic hazard analysis for heritage structures: an application to Gol Gumbaz, Vijayapura, South India Shiva Kumar G patil	34
7	Software application on Geotechnical by GOE5 and PLAXIS Shivasubramanian V	61
8	Experimental & Finite Element Studies on Geosynthetics Encased Floating Stone Columns Himmer Sarvayia	169
9	Stability & Seepage Anlysis of Hybrid Geosynthetic Reinforced Soil Slopes Tested In Centrifuge B.V.S. Vishvanadham	201
10	Use of GEOSTUDIO Software in Mounded Bullet Foundation Shri. Girish Rakhonde	225
